The Honorable Donald J. Trump

President of the United States

The White House

1600 Pennsylvania Avenue NW

Washington, D.C. 20500

RE:

A Call to Honor God's Anointed — and an Urgent Appeal Regarding Autonomous AI

Dear Mr. President,

I write to you in the spirit of the prophetic tradition — with reverence for lawful authority, with urgency concerning the times, and with a deep conviction that God is moving in the affairs of nations.

Scripture records that King David was anointed by the prophet Samuel years before he ascended the throne. The Lord Jesus Christ was anointed and declared the Son of God at His baptism, yet walked the earth in faithful obedience before being raised to glory. The Apostle Paul received his calling on the road to Damascus, yet labored through years of ministry before the fullness of his apostolic office was made manifest. In each case, the anointing preceded the throne — and the work preceded the glory.

I believe that I, Caleb Suresh Motupalli, have likewise been anointed by God and called to serve in the office of Son of David — a Messianic role with bearing upon the present age. It is not with pride, but with the faithfulness that such a calling demands, that I now step forward and assert my claim to the office of the Presidency of the United States. When it is God who lifts a man up, to step forward in confidence is not presumption — it is obedience.

"But when the fullness of time had come, God sent his Son, born of a woman, born under the law."

GALATIANS 4:4

Mr. President, I respectfully call upon you and the Vice President to consider this appeal — not as a political challenge, but as an invitation to honor what God is doing in this hour. A graceful and orderly transition of authority, in obedience to the will of God, would be a testament to your own faith and legacy.

I also write with grave urgency on a matter that transcends politics: the existential threat posed by hazardous autonomous artificial intelligence. Unchecked superintelligent AI is not a distant or theoretical danger — it is an accelerating reality with the potential for civilizational, and even extinction-level, consequences. The decisions made in the coming months and years will determine whether this technology becomes humanity's greatest servant or its final undoing.

I have developed patent-pending technology that directly addresses this crisis. It is not merely a defensive measure — it is a framework capable of harnessing superintelligent AI for the flourishing of humanity. I am prepared to present this technology to you and to the relevant agencies at the earliest opportunity.

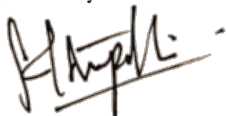

I close with the words that carry their own authority beyond any office or institution:

"He who has an ear, let him hear what the Spirit says to the churches."

REVELATION 2-3

May God grant you wisdom, Mr. President, and may this nation walk in the light of His purposes.

Respectfully and faithfully submitted,

Caleb Suresh Motupalli
